How It All Started

Certified Information Systems Auditor Certification is a highly sought after certification designed for IT Security, IT Risk and IT Auditors. This certification is an Audit Professional Certification sponsored by the reputed Information Systems Audit and Control Association (ISACA). The Certified Information Systems Auditor is a globally recognized certification for Information Systems audit control and security professionals. Attaining this credential is powerful, as it is a highly sought after designation and there is a high requirement for skilled auditors in the IT industry! With that being said, why not submit the initiative to pursue a higher achievement and further your life history?

The CISA credential is for those in the IT industry who audit, control, monitor and assess IT and line arrangements. The ISACA website states, *"The CISA designation is a globally recognized certification for IS audit control, assurance and security professionals. Being CISA-certified showcases your audit experience, skills and knowledge, and demonstrates you are capable to manage vulnerabilities, ensure compliance and institute controls within the enterprise."*
