# ABOUT CERTIFIED SUPPLY CHAIN PROFESSIONAL

Supply chain management is not just a process for reducing costs and achieving greater operational efficiencies within an organization. Although these are important considerations, modern supply chain management involves the strategic alignment of end-to-end business processes to achieve market and economic value, as well as a competitive advantage. Efficient supply chain management is accomplished by an organization proactively adopting initiatives to move suppliers and customers into collaborative relationships for common profit. Business professionals who want to make a significant impact on the efficiency, effectiveness or profitability of their organizations should consider learning more about supply chain management and its value for companies operating in a competitive global marketplace. This course of study is designed for individuals in service and manufacturing companies seeking to improve the potency of their supply chain. Students will gain in-depth knowledge of the new work processes necessary to acquire goods and services; ways to impact the company's bottom line through lower costs, lower prices; ways to partner for streamlining the acquisition of goods and services process; and new skills necessary in the areas of communication, business planning and global acquisition. Successful culmination of this course of study will enable participants to attain competitive advantage in the developing discipline of supply chain management.
